

ECONOMICS (ECONOMIC)

For up-to-date information on when online courses from the Distance Learning Campus are typically offered, see <https://www.uwplatt.edu/department/professional-program-support/course-offerings> (<https://www.uwplatt.edu/department/professional-program-support/course-offerings/>).

ECONOMIC 1010 Introduction to Economics 3 Credits

A study of economic systems and their interdependence in the global economy, with emphasis on problems and policies. Among the subjects included are competitive and non-competitive markets, gross domestic product determination and policy, the U.S. financial system, and global trade.

Components: Class

GE: Social Sciences

ECONOMIC 2130 Principles of Macroeconomics 3 Credits

An introduction to basic economic principles with applications to current economic problems. Demand, supply and the role of prices in the U.S. economy are briefly surveyed followed by in-depth study of the national (or macro) economy. Topics include unemployment, inflation and economic growth; theories of economic recession and prosperity; the role of money and banking in the economy; government taxing and spending policies to stabilize the economy; and the U.S. as part of the international economy.

Components: Discussion, Class

GE: Social Sciences

ECONOMIC 2230 Principles of Microeconomics 3 Credits

An introduction to basic economic principles with applications to current economic problems. Emphasis is on understanding how households and business firms make decisions in the U.S. economy. Topics include how prices are determined and how they help solve the economic problem of scarcity, the distribution of income and wealth, problems of monopoly power, labor unions and labor problems, environmental and energy concerns, and agricultural economics.

Components: Class

GE: Social Sciences

ECONOMIC 2940 The Political Economy of Race, Gender and Ethnicity 3 Credits

This course uses economic principles to analyze salient issues involving people of color, women, and ethnic minorities. The focus is interdisciplinary, drawing from the fields of business, political science, and others. Pertinent principles and concepts are used to analyze causes and effects of the changing composition of U.S. families, to examine the nature and extent of discrimination within the U.S. economy, and to understand why issues involving race, ethnicity, and gender are of concern to us both individually and collectively.

Components: Class

Cross Offering: ETHNSTDY 2940, POLISCI 2940

GE: Ethnic Studies, Gender Studies

ECONOMIC 4330 International Economics 3 Credits

A study of the major aspects of international trade, finance and commercial policy under changing world conditions. Subjects studied include various theories of international trade, effects of tariffs and quotas, exchange rate determination, balance of payments analysis and policy, international monetary systems, international economic institutions and current problems.
