

# INDUSTRIAL STUDIES (INDUSTDY)

---

For up-to-date information on when online courses from the Distance Learning Campus are typically offered, see <https://www.uwplatt.edu/department/professional-program-support/course-offerings> (<https://www.uwplatt.edu/department/professional-program-support/course-offerings/>).

## **INDUSTDY 1010 Principles of Safety and Risk Management 3 Credits**

A study of the principles of industrial safety and the associated management of the risk exposures. The course includes basic industrial safety concepts, analyzing safety and health issues at the workplace, accident causation, and prevention theories. Emphasis is placed on teaching them their role as a manager for safety in the work place. A review of applicable safety standards are also covered in the course.

**Components:** Class

## **INDUSTDY 1030 Introduction to Manufacturing 3 Credits**

An introduction to manufacturing principles, systems, and operations. The relationship of manufacturing to the major technological systems (Energy/power, Communication, Construction, and Transportation) is examined. Product development/engineering design is simulated through use of 3-D software.

**Components:** Laboratory, Class

## **INDUSTDY 1100 Introduction to the Construction Industry 3 Credits**

This course will provide an introductory overview to provide the students with a basic understanding of the construction industry. Each module will be introductory, experiential focused.

**Components:** Class

## **INDUSTDY 1130 Wood Technology 3 Credits**

An introduction to basic woodworking processes used by industry. The design process and problem solving are emphasized through development of a portfolio. A problem is identified by the student, then solved through the construction and testing of a project.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1010

## **INDUSTDY 1200 AC/DC Fundamentals 3 Credits**

Students study direct and alternating current circuits and their characteristics, Ohm's Law, Kirchhoff's Laws, voltage dividers, power, etc. Labs are performed using multimeters, oscilloscopes, circuit simulation software, and breadboards.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. or C: INDUSTDY 1010 and (Math placement level of 15 or MATH 15)

## **INDUSTDY 1230 Technical Drafting 3 Credits**

An introduction to basic drafting techniques as a means of graphic communication. The principles of defining shape and size are studied utilizing computer aided drafting techniques. Activities deal with precise, applied graphic representation including precision and limit dimensioning associated with a variety of industrial situations.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. Math placement level of 15 or MATH 15

## **INDUSTDY 1260 Building Construction Drafting 3 Credits**

An introduction to basic drafting techniques as it pertains to building construction. The principles of defining shape and size are studied utilizing computer aided drafting techniques. Topics include sketching, projection, architectural dimensioning, sections detail views, print reading, and components of residential and commercial building structures.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. Math placement level of 15 or MATH 15

## **INDUSTDY 1300 Construction Computer Applications 3 Credits**

An introduction to basic drafting techniques which includes introduction to: Blue Print Reading, and includes introduction to the following software Blue Beam, ProCore, Auto Cad, Revit as it pertains to construction. The principles of defining shape and size are studied utilizing computer aided drafting techniques, dimensioning, sections, detail views, printing and basic plans. The concept of scaling a construction plan(s) utilizing paper space and model space will be practiced.

**Components:** Laboratory, Class

## **INDUSTDY 1530 Power Systems Technology 3 Credits**

An analysis of methods of transferring industrial power. The basic principles of applied mechanisms, electrical actuators, control systems, engines and introductory pneumatics and hydraulics are emphasized in the course.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. or C: INDUSTDY 1010

**INDUSTDY 1830 Introduction to Plastics Processing 3 Credits**

The course is designed to cover the history and evolution of plastics synthesis and processing, while highlighting the important material properties that have driven current processing techniques. Safety and material testing are also emphasized as we discuss basic and established processing methods and explore advanced techniques used today and on the horizon.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. or C: INDUSTDY 1010 and INDUSTDY 1030

**INDUSTDY 2020 Basic Photography 3 Credits**

This is an introduction to basic digital photography techniques. Photographic history and contemporary issues will also be incorporated. The principles covered implement form, structure, color theory, visual aesthetics, semiotics, and organizational systems as applied to photography. The lecture will relate to hands-on assignments undertaken in the laboratory. It is the student's responsibility to have access to a working digital camera for the assignments related to this course.

**Components:** Laboratory, Class

**INDUSTDY 2040 Special Issues in Industrial Studies 1-3 Credits**

The study of selected topics common in the industrially oriented disciplines. The issues to be covered will be identified in the course title.

**Components:** Laboratory, Class

**INDUSTDY 2430 Building Construction Materials 3 Credits**

A study of the properties and application of building materials including concrete, block and brick masonry as they are related to residential and commercial building construction. Lab includes the introduction to 3D CAD modeling of buildings and the drawing of building details as they pertain to the building materials.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1010, INDUSTDY 1100 and INDUSTDY 1260 or INDUSTDY 1300

**INDUSTDY 2540 Materials and Techniques of Building Construction 3 Credits**

The basics of construction surveying, the properties and application of wood as a building construction material, an introduction to the use and application of the psychrometric chart, moisture control, the impact and prevention of mold, and analyses of building techniques. Lab includes the performance of various analyses via 2D/3D CAD, spreadsheets and other analysis methods.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 2430 and COMPUTER 1830 and Math placement level 30 or MATH 1530

**INDUSTDY 3050 Introduction to Metals Processes 3 Credits**

An introductory course surveying metalworking processes. Designed to impart academic and laboratory understanding of the fundamental principles of: machining, fabrication techniques, welding, casting and other metals manufacturing processes.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. or C: INDUSTDY 1010; P. ENGLISH 1130 or ENGLISH 1040; Math placement level 15 or MATH 15; and INDUSTDY 1030 or AGET 1750

**INDUSTDY 3130 General Industry OSHA 30 Hour 3 Credits**

A comprehensive, yet practical study of safety management principles and concepts for general industry designed for ITM/Occupational Safety Management majors/minors. Students learn various management strategies for the identification, evaluation, and correction of unsafe behaviors in the work place. Emphasis is placed on reduction of injuries, fatalities, and accidents in general industries such as manufacturing, healthcare, warehousing, distribution and retail through application of OSHA 29 CFR 1910. Upon successful completion of class (attendance required) students receive the OSHA 30 Hour card.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 3140 General Construction Estimating 3 Credits**

Principles, theories, and systems of general construction estimating; quantity survey techniques; standard forms; material costs and labor pricing; and the use of computer estimating software.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 2430

**INDUSTDY 3150 Manufacturing Materials 3 Credits**

The course introduces students to current manufacturing materials (polymers, metals, ceramics, and composites) under the lens of Material Science concepts. Focus is placed on the relation between material structure, properties, processing, and performance, with students exploring the fundamentals of atomic bonding, crystalline structures, phase diagrams, and kinetics in relation to material selection, design considerations, and applications of industrial materials.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. or C: INDUSTDY 1830 and INDUSTDY 3050

**INDUSTDY 3160 Machining and CNC Programming 3 Credits**

An intermediate course combining academic and laboratory principles of machining, Computer Numerical Control (CNC), computer assisted part programming, and CAD/CAM. Several laboratory projects develop knowledge and familiarity with machining centers and turning centers.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 3460; C: INDUSTDY 3050

**INDUSTDY 3180 Construction Safety Management 3 Credits**

A practical study of construction safety management principles and concepts are covered in this course designed for Building Construction Management majors or minors and Occupational Safety Management majors or minors. The course includes various management strategies for the identification, evaluation and correction of unsafe behaviors in effort to reduce injuries, fatalities and accidents on the construction site. Emphasis is also placed on the understanding of selected Code of Federal Regulations # 1926 OSHA Construction Industry Standards utilized in the development of a safe and healthy working environment.

**Components:** Class

**Prereqs/Coreqs:** P. (INDUSTDY 1010, INDUSTDY 1100, and (INDUSTDY 1260 or INDUSTDY 1300)) or (ITM-OSM Emphasis)

**INDUSTDY 3210 Commercial Construction Laboratory 3 Credits**

Laboratory and field experience in basic carpentry and masonry principles, concrete forming, brick and block laying, estimating, scheduling and related areas.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 2430 and INDUSTDY 3180

**INDUSTDY 3220 Construction Procedures 3 Credits**

Planning and analysis of work methods, scheduling and its computer applications, control of crews, materials and equipment selection, CPM and PERT methods of scheduling, contract types, the project manual concept, and construction specification writing and interpretation.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 2430

**INDUSTDY 3230 Digital Electronics 3 Credits**

Students will study digital and linear integrated circuits utilized in control systems applications. Timer circuits, logic gates, and interfacing will be used in applications. Field Programmable Gate Array and microcontroller programming and applications will be studied in class and implemented in labs.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1200

**INDUSTDY 3260 Semiconductors 3 Credits**

Students study the theory and applications of diodes; BJT, FET, and MOSFET transistors; SCRs, Triacs, etc. The lab focuses on rectifiers, filtering, voltage regulation, applications of transistor switching, and 8-bit microcontroller programming, I/O, and control.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1200

**INDUSTDY 3310 Metallurgy 3 Credits**

An intermediate course studying the physical and mechanical properties of metals and their alloys, and the principles of heat treatment of ferrous and non-ferrous alloys. Metallurgical sample preparation, image analysis, spectrographic and combustion analysis of metals will be explored.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 3050

**INDUSTDY 3350 Road and Infrastructure 3 Credits**

This course will provide students with an exposure to all aspects of the processes, equipment and materials relating to the Heavy Highway and infrastructure construction. The students will also be introduced to contract administration including, submittals and subcontracts. The students will learn the various construction management responsibilities such as the development of daily production reports, daily erosion control reports, safety audits, traffic control inspection etc.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 2430 and INDUSTDY 3180

**INDUSTDY 3460 3D Industrial Production Drafting 3 Credits**

Expands 2D drafting concepts using AUTOCAD and provides integration of drafting and design procedures with 3-Dimensional software. Students will explore introductory through intermediate techniques including part model creation, assembly model creation, part drawing documents, geometric dimensioning and tolerancing, and other modeling features related to 3D solid modeling. Students will apply drafting and design principles to component parts toward various applications to meet industry standards.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1030 and INDUSTDY 1230 and Math placement level 15 or MATH 15

**INDUSTDY 3480 Metalcasting Technology I 3 Credits**

Technical study and laboratory investigation into processes used in the manufacture of non-ferrous metalcastings. Special emphasis on the following processes: green sand molding and testing, evaporative pattern casting, investment casting, chemically bonded sand, and shell sand. Also, lecture and discussions on the following topics: gating practices, sand technology, coremaking, casting defects, pattern development, metallurgy of aluminum and light alloys, metallurgy of copper base alloys, and cast trends in the metalcasting industry.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1030 and INDUSTDY 3050

**INDUSTDY 3550 Fluid Power and Servo Systems 3 Credits**

The study of fluid power theory and their applications to agricultural and industrial processes. The course includes the examination of fluids, pumps, compressors, conditioners, control devices, actuators, symbols, and circuitry. Other course areas include an introduction to electrical, electronics, and fluid servo systems.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1530 or AGET 1750

**INDUSTDY 3560 Industrial Control Systems 3 Credits**

The course includes the principles of measurement and control fundamentals including relay control systems, ladder logic, programmable controllers, industrial sensors, control software, and computer-controller systems.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1200 and INDUSTDY 1530

**INDUSTDY 3570 Fleet Safety Management 3 Credits**

This course is designed to introduce the students to the potential for loss in fleet operations. Topics discussed will include case studies of fleet related incidents as well as the loss prevention strategies utilized by industry. The student will be introduced to the components of a fleet safety program and be required to develop an actual fleet loss control plan.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 3590 Industrial Hygiene and PPE 3 Credits**

This course consists of two major topic areas: industrial hygiene and personal protective equipment. The first is concerned with the chemical and physical hazards that impair the health of workers while on the job. Emphasis in the course is in recognizing, evaluating, and controlling hazards. Students receive experience in monitoring exposure of workers to harmful hazards and harmful physical conditions. The second topic area focuses on personal protective equipment (PPE) requirements and their use.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 3940 Materials Testing and Evaluation 3 Credits**

A technical study and evaluation of industrial materials and processes using destructive and nondestructive evaluation methods. The course is designed to increase breadth and depth of knowledge of differing material characteristics and properties. Emphasis is given to understanding and application of processes used in material selection and testing methods.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. (PHYSICS 1050 or CHEMISTRY 1050) and (INDUSTDY 3050 or INDUSTDY 1830)

**INDUSTDY 3950 Industrial Design for Production 3 Credits**

Study of design principles, production methods, and simultaneous manufacturing techniques. Emphasis is on understanding and application of the design process. Laboratory activities focus on the design and production of a product.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1010 and INDUSTDY 1030 and INDUSTDY 1230 and Math placement level 15 or MATH 15 and (ENGLISH 1130 or ENGLISH 1040) and ENGLISH 1230

**INDUSTDY 4020 Topics in Industrial Studies 1-3 Credits**

The study of selected topics common to the industrially oriented disciplines. The topic to be covered will be identified in the course title.

**Components:** Class

**Prereqs/Coreqs:** P. consent of instructor or department chair

**INDUSTDY 4030 Electrical Power 3 Credits**

A study of the methods and systems of AC and DC power generation, distribution, and motors. Other course areas include motor controllers, mechanical switches, and other industrial control systems.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1200

**INDUSTDY 4050 Road and Infrastructure Lab 3 Credits**

This class is one of three High Impact Courses offered in the program. This course is a hands-on laboratory/field experience in basic site layout and problem solving challenges regarding road and infrastructure construction projects. Including but not limited to: soil grading and compaction techniques, roadway and bridge construction, overhead and underground utilities, site drainage and site erosion control, estimating, scheduling, traffic control and construction heavy equipment safety training. The main goal of this class is to appreciate the importance of accuracy, implementation and urgency of a construction related task relative to the lab project schedule. (This is a live weather site).

**Components:** Field Studies, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 2430, INDUSTDY 3180, INDUSTDY 3350, and instructor consent

**INDUSTDY 4160 Metal Manufacturing Senior Design 3 Credits**

Application of the principles of design, metal cutting theory, CNC programming, metalcasting, and other metals manufacturing methods. In order to complete the semester project students will also apply production tooling methods, cost and time estimating, and quality measurement. An in depth final report and presentation are required.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. (INDUSTDY 3050 and INDUSTDY 3160) OR (INDUSTDY 3480 and INDUSTDY 3460)

**INDUSTDY 4360 Specialized Drafting Practices 3 Credits**

This course provides an integration of 3-D drafting practices as they are applied to technical drafting problems. Conventional and computer aided drafting and design procedures will be applied to auxiliary and sectional views, geometric dimensioning and tolerancing, gears, cams, fixture layout, applied mechanics, and special fields of drafting to create assembly drawings for production.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1030 and INDUSTDY 1230 and INDUSTDY 3460

**INDUSTDY 4410 Construction Hazard Control Solutions 3 Credits**

The course is entirely dedicated to identifying and developing control plans for the hazards associated with the entire construction industry. This course is designed so the student will be able to recognize, evaluate and develop safety management techniques for the control of the hazards associated with the operations of all areas of construction including but not limited to: residential, light commercial, heavy commercial, industrial, heavy industrial and the transportation industry. This class is completely dedicated to current applications in the construction industry.

**Components:** Class

**INDUSTDY 4450 Hot Metal Processing 3 Credits**

This course will cover the hot processes of metals such as: forging, metal extrusion, welding, powder metallurgy, thermal spray, and advanced heat treatment. Other topics will include emerging materials and refractory metals. This course will also study in-depth, the metal production processes.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 3050 AND (INDUSTDY 3310 or INDUSTDY 3150)

**INDUSTDY 4480 Industrial Robotics 3 Credits**

Study and application of robotic systems to include: fundamentals, classification, integration in manufacturing systems, end-effectors, sensors, vision systems, auxiliary equipment and control systems, safety and cost justification. Basics of robot programming is applied.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1200 AND (INDUSTDY 1530 or AGET 1750)

**INDUSTDY 4490 Metalcasting Technology II 3 Credits**

In depth course in cast iron metallurgy and ferrous foundry practice. A semester project is chosen and followed through to completion. To complete the project many skills will be taught: melting practice and furnace operation, calculation of the risering and gating system, verification using computer modeling, patternmaking, molding, and pouring. Metallurgical analysis of the project produced is also necessary and a final report and presentation will be made.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1030 and INDUSTDY 3050 and INDUSTDY 3310 and INDUSTDY 3460

**INDUSTDY 4510 Construction Heavy Equipment Safety 3 Credits**

The course is dedicated to the hazards associated with the heavy equipment that is used in the construction industry. This course is designed so the student will be able to recognize, evaluate and develop safety management techniques for the control of the hazards associated with the operation of the heavy equipment.

**Components:** Class

**INDUSTDY 4520 Construction Technical Certifications 3 Credits**

The course is entirely dedicated to the enhancement of the Building Construction Safety Management student's portfolio. The course will include several nationally recognized professional development modules. They include but are not limited to the following: crane safety, excavation safety, aerial lift safety, forklift safety, fall protection safety, arc flash safety, confined space safety rigging, safety crane signaling. Note: This course may require extra time out side of the normal class room hours to complete.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 4510; C: INDUSTDY 4910 (for ITM majors only)

**INDUSTDY 4530 Commercial Planning and Design 3 Credits**

Residential planning, design and construction; specific emphasis is placed on the presentation plans, home ownership, housing, design requirement, and special structural design considerations. Laboratory work consists of developing a complete set of working architectural plans and related specifications using conventional and CADD drafting practices.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 2430

**INDUSTDY 4630 Building Systems Analysis 3 Credits**

The major building systems which include electrical systems, climate controlling systems, lighting systems, and water supply and drainage systems are studied.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 2430

**INDUSTDY 4660 Construction Management Internship 1-8 Credits**

An on-the-job assignment commensurate with the instruction program and approved by the industrial internship coordinator.

**Components:** Field Studies

**Prereqs/Coreqs:** P. INDUSTDY 1010 and 15 additional credits in industrial studies

**INDUSTDY 4670 Construction Safety Management Internship 1-8 Credits**

An on-the-job assignment commensurate with the instruction program and approved by the industrial internship coordinator.

**Components:** Field Studies

**Prereqs/Coreqs:** P. INDUSTDY 1010 and 15 additional credits in industrial studies

**INDUSTDY 4680 Manufacturing Technology Management Internship 1-8 Credits**

An on-the-job assignment commensurate with the instruction program and approved by the industrial internship coordinator.

**Components:** Field Studies

**Prereqs/Coreqs:** P. INDUSTDY 1010 and 15 additional credits in industrial studies

**INDUSTDY 4690 Occupational Safety Management Internship 1-8 Credits**

An on-the-job assignment commensurate with the instruction program and approved by the industrial internship coordinator.

**Components:** Field Studies

**Prereqs/Coreqs:** P. INDUSTDY 1010 and 15 additional credits in industrial studies

**INDUSTDY 4710 Hazard Control Solutions 3 Credits**

The course is entirely dedicated to identifying and developing control plans for the hazards associated with general industry. This course is designed so the student will be able to recognize, evaluate and develop safety management techniques for the control of hazards associated with the operations of a multitude of industrial/technical operations. This class is completely dedicated to current applications in the industrial/manufacturing sectors of industry.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 4720 Seminar in Safety 3 Credits**

Programs in safety are explored with safety resource experts from industry, education, and government agencies invited as speakers. Additional time is devoted to topics to prepare the safety student for the safety profession. Included would be such topics on how to develop resumes, employment opportunities in the safety profession, and certification available in the safety profession.

**Components:** Seminar

**Prereqs/Coreqs:** P. INDUSTDY 1010 and junior standing

**INDUSTDY 4740 Additive Manufacturing and Specialized Processes 3 Credits**

The course explores recent technological advancements in manufacturing techniques including laser cutting, electrical discharge machining, and water-jet cutting with an emphasis on additive manufacturing (AM) processes. Students will learn the seven variations of AM and explore every aspect of the process, from general printer operation and use of slicing software to 3D model design, basic PLC logic and G-code programming for CNC, actuator control, and component assembly.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1830 and INDUSTDY 3050 and INDUSTDY 3460

**INDUSTDY 4750 Disaster Preparedness 3 Credits**

Principles of organization on the local, state, and national levels concerning natural and human disasters. A systematic and realistic approach to hazard analysis and mitigation. An opportunity is provided to participate in a class disaster preparedness project.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 4760 Technical Certifications 3 Credits**

The course is entirely dedicated to the enhancement of the ITM/Occupational Safety Management student's portfolio. The course will include several nationally recognized professional development-type modules. They may include, but are not limited to the following; overhead crane safety, excavation safety, aerial lift safety, forklift safety, fall protection safety, arc flash safety, confined space safety, rigging safety, crane signaling, process safety management, and robotics safety. Note: This course may require extra time outside of the normal class room hours to complete all certifications.

**Components:** Laboratory, Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 4770 Loss Control Safety Management 3 Credits**

The role of management involved with principles of organization, implementation, administration, and evaluation of occupational safety programs is provided in the course. Methods of controlling losses, basic risk management theories, behavioral-based safety concepts and others are studied. Emphasis is placed on accountability and measuring safety performance at all levels of industry.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 4800 Mold Design and Production 3 Credits**

The course explores the facets of mold design, production, and evaluation. Lectures offer discussion of proper design concepts such as gating, venting, and reinforcement placement, as well as the use of mold flow and heat transfer modeling software. Various lab modules provide a hands-on exploration of lecture topics which allow students to complete a course project that guides them through the design, production, and testing of an injection molding, extrusion, or thermoforming mold of their creation.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1830 and INDUSTDY 3050 and INDUSTDY 3460; P. or C: INDUSTDY 4850 or INDUSTDY 3480

**INDUSTDY 4820 History & Principles of Career and Technical Education 2 Credits**

An examination of the historical roots of Career and Technical education. Readings and research are conducted on the current trends and issues facing Career and Technical education in a high tech society. Satisfies DPI Certification.

**Components:** Class

**Prereqs/Coreqs:** P. TEACHING 1230

**INDUSTDY 4840 Construction Administration 3 Credits**

Construction company organization; contract documents; legal, ethical, business, and management procedures; and principles of construction management.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 2430

**INDUSTDY 4850 Plastics Processing I 3 Credits**

The course offers an in-depth exploration of extrusion, compression molding, injection molding, and reaction injection molding. Students will learn the history, current status, and projected future of each process in industry, as well as their roles and limitations. Lectures and discussions are supplemented with hands-on lab activities and operation of processing equipment.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1830

**INDUSTDY 4860 Plastics Processing II 3 Credits**

Serving as a continuation of Plastics Processing I, the course explores blow molding, transfer molding, thermoforming, and polymer matrix composite processing techniques. The historical, present, and future industrial status of each process is discussed along with their place in industry. Each process is demonstrated by videos, site tours, and hands-on lab activities using relevant equipment.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1830

**INDUSTDY 4880 Fire Protection and Environmental Safety 3 Credits**

This course consists of two major topics of study: (a) A study of the nature and theory of fire hazards; preplanning to prevent fires; the systems approach to fire protection services; the technology of fire control; and the application of theory and technology to solving fire problems; and (b) developing an understanding of the principles and concepts inherent to the environmental regulatory structure within the United States and the State of Wisconsin. Students will receive an overview of environmental regulations, terminology, and management practices

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1010

**INDUSTDY 4890 Plastics Senior Design 3 Credits**

The capstone course provides students with an opportunity to apply the concepts learned and skills developed during the program through a materials research or product design project. Students electing a materials research project will synthesize, process, and evaluate a material based on the conditions of their approved research plan. Students electing a product design project will employ material selection and product design concepts, mold design and production concepts, and evaluate the resulting product in its performance in the intended application. Options for collaborative projects with students from the Metals Processing Technology Minor may also be available.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 3460 and INDUSTDY 4860

**INDUSTDY 4900 Work Measurement and Human Factors 3 Credits**

A study of methods to improve productivity, efficiency and effectiveness of work methods. This course is intended to provide an understanding of the principles of motion economy and work measurement techniques using graphing and charting tools, process picture mapping, 5S value stream mapping, quantitative analysis methods, lean manufacturing and SixSigma concepts. The course is designed for those responsible for supervising or conducting work measurement in industry, but is also valuable for any business or service organization.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1030 and MATH 1830

**INDUSTDY 4910 Construction Safety Capstone 3 Credits**

This course is designed to provide the senior level student the skill sets for the development of the management tools necessary to be successful in the construction safety management profession. The course will include the development and application of the GAP process. The components of a risk management improvement plan, safety manual, critical incident management process and an organizational performance system will be covered. The students will apply the concepts of the psychology of risk, as well as gaining the experience of communication within an organization both in written and presentation formats. The student will receive actual tools to take with them to utilize in their new profession.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 4510; C: INDUSTDY 4520 (for ITM majors only)

**INDUSTDY 4940 Quality Assurance 3 Credits**

The study of techniques and procedures of assuring and maintaining the quality of industrial products and services. Statistical process control methods such as variable and attribute control charts, acceptance sampling, process capability and reliability are examined. The course also studies modern quality systems, Six Sigma, industrial experimentation and ISO standards.

**Components:** Class, Laboratory

**Prereqs/Coreqs:** P. INDUSTDY 1030 and MATH 1830

**INDUSTDY 4950 Production Planning and Control 3 Credits**

An investigation and study of the integrated approach of effective management practices associated with production planning, scheduling, and control. Operations strategy, quality of work life, global competition, lean manufacturing, forecasting methods, supply chain management practices, scheduling and plant facilities layout are stressed.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 1030

**INDUSTDY 4960 Commercial Building Planning and Construction Techniques 3 Credits**

Specific emphasis is placed on planning/materials/methods and construction practices associated with general building construction including people/buildings/cities, land planning, infrastructure, equipment/machines, codes, pre-engineered buildings, and innovative technologies.

**Components:** Class

**Prereqs/Coreqs:** P. INDUSTDY 2430 and INDUSTDY 3180

**INDUSTDY 4970 Independent Study in the Department of Industrial Studies 1-3 Credits**
